

PROCUREMENT INFORMATION

The Association has a Reactive & Planned Maintenance Framework in place. The Framework enables MHA to bring together service requirements to allow improved contract management opportunities, and the ability to build a long term working relationship with each contractor for the duration of the agreement.

The tender and evaluation process for this was carried out in accordance with Public Contracts (Scotland) Regulations 2012/EU Procurement Directives and conducted by MHA staff along with external consultants Brown & Wallace; the Framework consists of 17 lots, and became effective from 22nd April 2017 (midnight) and will run for a 4 year period from 2017 – 2021.
